# Jens J Meyer

Vom Raum zum Licht  
Moving from Space to Light

Through Space to Light is the title of this book about the oeuvre of Jens J. Meyer that comes out as ff publishers' first artist monograph. With the works by this artist, the publisher sets a benchmark for upcoming titles. These works are – and that applies to the site-specific works as well as the sculptures – highly intriguing installations that have an immense impact using a minimum of material.

Space and light are essential to the effect of the sculptures and installations. Jens J. Meyer takes the existing space and divides its continuum into a multitude of empty spaces with stretched sheer fabric. In this way, an immaterial sculpture of equal value emerges as a counterpart to the filigree material work.
